Islamic Investment: Products, Opportunities, and Challenges

Farouk Abdullah Alwyni
Director, PT. Al-Ijarah Indonesia Finance

Paramadina Graduate School of Business
30 June 2009
Agenda

1. What is Islamic Investment?
2. Islamic Investment Products in the International Financial Market
3. Islamic Investment: Opportunities & Challenges
4. Islamic Investment & Equity Based Intermediation System
Islamic Investment is part of the Growing Islamic Banking & Finance Needs

**Banking and finance needs**

**Shariah sources**
- Qur'an
- Sunnah
- Ijma' (jurist consensus)
- Qiyas (analogy)
- Ijtiham (reasoning)

**Fiqh al-Muamalaat contracts**
- Musharaka - Partnership
- Mudaraba - Partnership
- Murabaha - Purchase-resale
- Ijara - Lease
- Istisna' - Manufacturing contract
- Salam - Forward sale

**Islamic Investment Solution**

- **Asset-backed transactions**
- **The Principle of “No Risk, No Reward”**

- **Prohibition of certain investments:**
  - Sectors (e.g.: alcohol, armaments, financial services, gambling, pork, pornography, tobacco)
  - Instruments (e.g. no forward transactions, limited option use, no derivatives, short-selling)

- **Type of Investments:**
  - Through the Capital Market
  - Direct Investment (Islamic Private Equity Fund & Venture Capital)

- **Islamic Investment: Toward Equity based Financial Intermediation**

Islamic Investment: Products, Opportunities, and Challenges
| The very objective of the Shariah is to promote the welfare of the people, which lies in safeguarding their faith, their life, their intellect, their posterity and their wealth. Whatever ensures the safeguarding of these five serves public interest and is desirable.  
Al-Ghazali | The basis of the Shariah is wisdom and welfare of the people in this world as well as the Hereafter. This welfare lies in complete justice, mercy, well-being and wisdom. Anything that departs from justice to oppression, from mercy to harshness, from welfare to misery and from wisdom to folly, has nothing to do with the Shariah.  
Ibn al-Qayyim |
Islamic Capital Market Products

Shariah Compliant Equities & Indices

(i) the business of the company whose stock to be traded;
(ii) the form of stock/share contract;
(iii) Shariah compatibility of trading practices pertaining to stock

Sukuk

Investment sukuk are certificates of equal value representing undivided shares in ownership of tangible assets, usufruct and services (in the ownership of) the assets of particular projects or special investment activity, however, this is true after receipt of the value of the sukuk, the closing of subscription and the employment of funds received for the purpose for which the sukuk were issued

Islamic Depository Receipt

A depository receipt is a negotiable and transferable instrument that is traded on the stock exchange of a country (or jurisdiction) but represents a stock that is listed and issued by a firm in another country (or another jurisdiction)

Shariah-based Unit Trust Funds

The Shariah-based unit trust funds are collective investment funds that offer investors with the opportunity to invest in a diversified portfolio of Shariah-compliant securities. The schemes are available in many forms such as Islamic equity funds, bond funds, index funds and others

Direct Islamic Partnership/Investment

• **The Contracts:** Mudharaba and Musharakah
  - Mudharabah => Agreement between capital provider & entrepreneur to enable the entrepreneur to carry out business activities. Profit will be shared on pre-determined ratio and losses will be borne by capital provider
  - Musharakah => Partnership financing agreement between two parties or more to engage in a specific business activity

• **Modern Application:** Islamic Private Equity Funds & Venture Capital

• **Institutions:** Gulf Finance House; Kuwait Finance House; Musharaka Venture Management; etc

Islamic Investment: Products, Opportunities, and Challenges
Opportunities & Challenges

**Opportunities**
- The growing Muslim awareness
- The growing trend of an ethical investment
- Global Crisis: Prompt the Search for an alternative economic model
- The growing Muslim minority in the West
- Alternative Source of Funding

**Challenges**
- Transforming the deeply embedded debt intermediation system
- The need to change the broader system
- Innovation & Product Development
- Human Resource Development
- Need “extra efforts” to create understanding to shareholders on the necessity to integrate between “short-term profits objective” & “longer term bigger objective”

“Efforts however are underway”
Integrated and Coordinated Approach Taken to Develop Malaysia’s International Islamic Finance Position

“make Britain the gateway to Islamic finance & trade”
Gordon Brown

Source: British Delegation to the 5th WIEF 2009
The major cause of the current financial turmoil and most of the previous financial crises is excessive leverage that is inherent consequence of the current debt-based financial system. In contrast, Islam discourages debt in general and in particular incurring debt for living beyond one’s means or to grow one’s wealth.

Proposed Model:
- Direct risk participation ventures like Mudaraba (Investment Trust);
- Return will be contingent upon the performance;
- The Financial Institution (FI) will not guarantee a fixed rate of return to the investors;
- Mudaraba investment will be treated as off-balance sheet assets and will be 0% risk-weighted for capital adequacy purposes;
- No deposit insurance;
- Savers will not be entitled to any return;
- The banks will not be able to deploy the funds deposited in wadiah accounts, which will have to be 100% risk-weighted;
Islamic Investment: Toward Equity Based Intermediation System

• The Regulation under the Proposed Model:
  - The wadiah funds are safe and secure;
  - Investors are given adequate information on Mudaraba investments;
  - There are no scams or illegal investments; and
  - The marketing is not misleading, confusing or deceiving;
  - The financial institutions to also co-invest in their portfolios (known as musharaka or partnership financing);
  - The nature of regulation may be a hybrid between the banking regulation and the securities industry regulation.

• More research needs to be done to ensure gradual transition to the alternative model is not disruptive to the economy. Without such a transition, Islamic Finance will never become an alternative and sustainable financial model.
Proposed Islamic Model & Chicago Plan

• Chicago Plan (proposed during the Great Depression in the 1930s) is a banking reform plan submitted to President Roosevelt by a group of noted economists from the University of Chicago;

• The plan primarily proposed among others the abolition of the fractional reserve model and the separation between commercial & investment banking (i.e. Payment & capital deployment activities). The plan also advocated (i) a 100% reserve for all demand deposits; (ii) a 0% reserve for investment trusts; and (iii) no deposit insurance;

• There is a similarity in term of the abolition of the fractional reserve model between Chicago Plan & the Proposed Islamic Model

• The proposal to abolish the fractional reserve system was dropped due to strong lobbying by bankers, who directly benefited from the status quo model.

• Thus, the saying goes: “President Roosevelt missed a great opportunity seven decades ago. Let us not miss this opportunity now.”

The Future of the Islamic Finance Entities: Some Thoughts

• Other than its function to maintain the stability of the real value of money, the Central Bank within the Islamic framework should also bear responsibility of foreclosing the possibility of concentration of wealth and power in the hands of vested interests through the financial institutions (by among others allocation of credit within the framework of socio-economic justice);

• Commercial banks within an Islamic framework should play the role beyond merely a profit-maximising entity but rather a more goal oriented entity. This entity would be a cross-breed of commercial and investment banks, investment trusts and investment management institutions, and would offer a wide range of services to the customers (long term bank-client relationship);

• Specialised credit institutions to assist small & micro businesses through mudarabah advances or qard hasan;

• Deposit Insurance Corporation (DIC) should be there to insure demand deposits at the commercial banks

• Investment Audit Corporation like DIC should be a government-sponsored organisation whose main objective is to audit the accounts of mudaribs who have obtained funds from others directly or through commercial banks

Source: Chapra, 1986
Critical Success Factors

- **Dedicated people**
  - Greatest intangible to bring the Islamic finance to the new height and build its future
  - Human capital development: financiers and Shariah scholars

- **Synergy between Academic & Business for further development**
  - Academic input to formulate visionary framework and development
  - Capital sponsorship to bring plans to life

- **Change in mindset**
  - From Shariah-compliant to Shariah-driven products and services

- **Education of all key stakeholders**
  - To build understanding and awareness

- **Proactive engagement**
  - Regulators, practitioners and Shariah scholars to set a common agenda

Need for co-ordination to enable further development

Source: Khan, 2007
“We need more fundamental changes. Economic systems are human creations. Every economic institution and program, from banks and corporations to unemployment insurance and Social Security, is a human invention. ... We must decide which economic rules we want to keep and which we want to leave behind, and invent new economic rules that meet our authentic human needs. If we join together to demand these new rules, we can each play a part in moving toward a more caring economics and a more caring world.”

Riane Eisler

“According to market fundamentalism, all social activities and human interactions should be looked at as transactional, contract-based relationships and valued in terms of a single common denominator, money. Activities should be regulated, as far as possible, by nothing more intrusive than the invisible hand of profit-maximizing competition. The incursions of market ideology into fields far outside business and economics are having destructive and demoralizing social effects. ... Even if we put aside the bigger moral and ethical questions and concentrate solely on the economic arena, the ideology of market fundamentalism is profoundly and irredeemably flawed. To put the matter simply, market forces, if they are given complete authority even in purely economic and financial arenas, produce chaos and could ultimately lead to the downfall of the global capitalist system.”

George Soros

“Some men see things as they are, and say, ‘Why?’ I dream of things that never were, and say, ‘Why not?’”

George Bernard Shaw
